## Helo Cup

The Helo Cup is an excellent stove for regular-sized home saunas. It is easy to install and pleasant to use. It heats up quickly, and as it is mounted on the wall, does not take up extra space in the sauna.

Due to its popularity, the Helo Cup range has plenty to choose from. The Helo Cup STJ model has a built-in thermostat and timer with 9 hours pre-heating time and 3 hours running time. The clear and easy-to-use controls are located on the lower part of the front panel, either on the right or left side as selected by the customer.

The Helo Cup range offers stoves which are suitable for saunas measuring 3-14 m<sup>3</sup>. The recommended amount of stones is 15-23kg, depending on the power of the stove

### Statistics: Helo Cup 45 STJ

Requires 20amp single phase, power

Sauna room size: 3-6m<sup>3</sup> (4.5kW)

Dimensions of heater (45): height 410mm x length 580mm x width 280mm
