

sauna & steam

Helo Vienna

The new Helo Vienna is designed for modern home saunas. The Vienna heater range is suitable for sauna rooms measuring 3-12 m³. The stove is easy to install and pleasant to use – and as it is mounted on the wall, the heater never takes up extra space. You also get a choice of colours to match the design and ambience of your sauna room.

The clear and easy-to-use controls are located on the side panel, either on the right or left side as selected by the user. The heater has a built-in thermostat and a timer with 9 hours pre-heating time and 0-3 hours of running time.

The amount of sauna rocks is 12 or 20 kg dependant on heater power. In the 6 kW model you can fine-tune the size of the stone compartment to your liking, for 12 or 20 kg of sauna stones. A smaller quantity of rocks will heat rapidly whereas a larger mass will caress you with soft, well-rounded steam.

Statistics: Vienna 45

Requires 20amp single phase power

Sauna room size: 3-6m³ (4.5kW)
