

Helo Himalaya

Himalaya – the name of the legendary mountain range means “home of the snow”. Like its namesake, the secret of Helo’s Himalaya also lies in the natural water cycle.

The new sauna stove conceals a water container featuring ingenious BWT technology, which humidifies the sauna room while it is warming up. So when you climb up onto the benches, the air is already pleasantly humid and easy to breathe. You can enjoy the rich warmth on your skin already at a slightly lower temperature.

Himalaya stoves are meant for sauna rooms measuring 5-15 m³. The attractive stove is 103 cm high and comes in matte black or chrome.

Statistics: Himalaya 701 DE BWT

Requires 32amp single phase, power

Sauna room size: 5-9m³ (6.8kW)

Dimensions of heater: height 330mm x length 1030mm x width 330mm

Weight of stones: 100kg

Minimum gap to side wall: 60mm

Colours available: Black & Brushed Steel

Statistics: Himalaya 1051 DE BWT

Requires 20amp three phase power and control panel

Sauna room size: 9-15m³ (10.5kW)

Dimensions of heater: height 330mm x length 1030mm x width 330mm

Weight of stones: 100kg

Minimum gap to side wall: 60mm

Colours available: Black & Brushed Steel
