

& sauna & steam

TylöHelo Elite Control Panel

Tylö's new, state-of-the-art Elite control panel takes your sauna and steam bath to a whole new level. Elite has a processor and an operating system which support a host of advanced functions. Create and save multiple user profiles and favourite settings and enter different schedules for different days of the week. Then add functions like standby, extra fans and the option of multiple fragrance pumps which allow you to switch between fragrances while the system is running.

With its elegant colour and shape, Elite fits into all kinds of setting. Elite is fitted with a crystal-clear 4.5 inch screen and installation is very discreet and tidy. With the option of a flush-fitted frame, you can recess the panel in the wall. Elite can also be placed inside a sauna or steam room.

You can turn on your sauna without leaving the sofa. Elite gives you full control over all the functions of the sauna, including temperature, humidity, fragrance and lighting. You can also control it from your phone using Tylö's Well access app, which is available for both iOS and Android.
